

Hosted Payments.

Seamless, Secure, Online Customer Payment

MerchantESM Hosted Payments is an easy way to add payment acceptance to any website.

Businesses direct their customers to a secure online form to enter their payment information. Using simple “copy & paste” code to redirect shoppers to the MerchantE server, your customer completes the transaction and returns to your website.

Hosted Payments enables you to:

- Accept card and ACH payments on your website
- Display your logo and other branding elements on the payment form for continuity with your website and a seamless customer experience
- Offer customers the option to checkout as guest or create an account to leverage stored payment information and recurring payment options
- Enable your customers to manage their stored payment details and recurring payment plans with the feature-rich Customer Management Center
- Reduce hacker threats and PCI burden with sensitive cardholder data securely managed by MerchantE
