Card Swipe for NetSuite®

Accept In-person Card Payments Seamlessly Integrated to NetSuite

Improve the customer experience, speed up transactions and reduce processing costs by utilizing Card Swipe for SuitePayments for in-person payment card transactions. Seamlessly integrated to NetSuite order flows, this add-on solution makes it easy to get started with minimal training or changes to your current business procedures.

With Card Swipe for NetSuite you can:

— Accept in-person payments with a portable USB reader

— Reduce processing costs with lower card-present rates

— Enjoy faster checkout, on both sides of the counter

— Experience ease of use with existing NetSuite order workflows

Begin processing in-person payments with a simple download of Card Swipe for NetSuite. Plug in your USB card reader and start accepting payments. For convenience and streamlined customer experience, you can choose to save swiped card data, stored on file as secure tokens for future payments.

This solution is compatible with MerchantE for SuitePayments capabilities including saving cards on file, Automated Reconciliation and Account Updater.

Accept in-person payments within the current NetSuite order workflow:

— Invoice

— Sales Order Payment

— Cash Sale

— Accept Customer Payments

— Customer Deposit

— Customer Refund
