

Payment Facilitator.

Generate a new revenue stream for your business and optimize the payment acceptance experience for your customers.

Expand the capabilities and value of your software by offering an integrated payment acceptance solution.

What is a Payment Facilitator?

A payment facilitator is a master merchant with the ability to open sub-merchant accounts under its umbrella.

Solution Providers that become payment facilitators can ease the complexity of payment processing onboarding and lengthy underwriting requirements for their clients.

Create a competitive advantage

- **Generate a new revenue stream**
Increase top-line revenue by embedding payments into your software, earning additional funds for every transaction processed.
- **Deliver a more valuable software solution**
Meet more of your customer's needs while also removing friction and speeding up the payment acceptance process.
- **Control more of the customer experience**
Create better customer experiences by eliminating unnecessary 3rd parties and owning all aspects of the payment acceptance experience.
- **Gain customer loyalty**
Incorporate your business into more aspects of your client's operations, deepening engagement, streamlining processes and creating more efficiencies
