

Virtual Terminal.

Accept payments from any connected device

MerchantE Virtual Terminal combines a merchant account with secure web-based payment acceptance software, allowing you to easily process credit and debit cards from any Internet-connected PC or Mac wherever you do business: at the checkout, in the back office, or at a tradeshow. Simply launch your browser, login, and enter payment details received in person, over the phone or through the mail. Attach a card reader to speed the capture of cardholder data and eliminate manual keying errors. Set up customer records to easily manage subscription and recurring payments.

Because Virtual Terminal is web-based, there is no software to maintain. MerchantE manages all system enhancements and changes in the cloud, allowing you to keep up with new technologies and trends.

Key Features

- **Get Up and Running Quickly** – Input fields are intuitive and easy to use
- **Securely Manage Payments and Risk** – Sensitive customer and transaction information is securely stored
- **Create Customer Records and Manage Recurring Payments** – Recurring payments can be automatically scheduled
- **Provide Useful Reporting Data to Commercial Clients** – Advanced data fields capture Level 2 and Level 3 information—such as sales tax, invoice number, and purchase details—on transactions made with corporate or purchasing cards, which simplifies accounting for business and government customers
- **Gain Transaction Insights** – Real-time web reports and customer transaction history are at your fingertips, including the ability to view consolidated reports across multiple accounts
- **Get Around-the-Clock Support** – Our award-winning Customer Care team ensures you have one source for processing and technical support whenever you need it
